

Trash Free Hawaii is a campaign by the State of Hawaii Department of Transportation, Highways Division, Oahu District - Storm Water Management Program to help prevent trash pollution from entering our community's valuable water resources.

Our storm drains and sewers are separate systems. Anything that enters our storm drain system flows, untreated, directly into the ocean, negatively affecting water quality and marine life.

Oahu generates more than 2.2 million tons of waste annually from residential, commercial and industrial sources. It's everyone's responsibility to protect our oceans. Together, we can take small actions to make big changes.

On Oahu, volunteer for the Adopt-A-Highway program to pick up litter along our highways. Visit [www.stormwaterhawaii.com/adopt-a-highway/](http://www.stormwaterhawaii.com/adopt-a-highway/) for more information.

### Bulky Item Pickups

Free monthly pickups are scheduled for all areas of Oahu. To check your next collection pickup date, visit [www.trashfreehawaii.com/resources](http://www.trashfreehawaii.com/resources).

### Recycling Centers

Recycle your Hi-5 beverage containers, newspaper, plastics, corrugated cardboard, auto batteries, e-waste and scrap metals.

### Household Hazardous Disposal

Some of the products you use at home are potentially dangerous; make sure you safely handle and properly dispose of the materials.
